Modelling of Geo-Biosphere Processes

Special Issue

Validation of Agroecosystem Models

Preface 1

Validity of agroecosystem modelsA comparison of results of different models applied to the same data set
B. Diekkrüger, D. Söndgerath (Braunschweig, Germany), K.C. Kersebaum (Müncheberg, Germany) and C.W. McVoy (Braunschweig, Germany) 3

A dynamic model describing leaf temperature and transpiration of wheat plants
S. Claus, P. Wernecke, U. Pigla and G. Dubsky (Quedlinburg, Germany) 31

Simulation of the soil water balance on the "Intensive Loam Site"
M. Morgenstern and R. Kloss (Oberschleißheim, Germany) 41

Simulation of soil water and evapotranspiration using the model BOWET and data sets from Krummbach and Eisenbach, two research catchments in North Germany
W. Mirschel, K.-O. Wenkel and R. Koitzsch (Müncheberg, Germany) 53

The user's influence on model calibration results: an example of the model SOIL, independently calibrated by two users
P. Botterweg (Ås, Norway) 71

Simulation of water fluxes using different methods for estimating soil parameters
B. Diekkrüger and M. Arning (Braunschweig, Germany) 83

Simulation of soil water dynamics and herbicide persistence in a silt loam soil using the MACRO model
N.J. Jarvis (Uppsala, Sweden) 97

Modeling pesticide dynamics of a loam site using HERBSIM and SIMULAT
B. Diekkrüger, P. Nörtersheuser and O. Richter (Braunschweig, Germany) 111

Opus simulation of a wheat/sugarbeet plot near Neuenkirchen, Germany
R.E. Smith (Fort Collins, CO, USA) 121

Simulating soil water balance, nitrogen behaviour and biomass components, using the agroecosystem model AGROSIM-WinterWheat and data from the north German Krummbach catchment
A. Schultz (Eberswalde, Germany) and W. Mirschel (Müncheberg, Germany) 133

Application of a simple management model to simulate water and nitrogen dynamics
K.C. Kersebaum (Müncheberg, Germany) 145

Simulation of water and nitrogen flows and plant growth for a winter wheat stand in central Germany
K. Blombäck, M. Ståhli and H. Eckersten (Uppsala, Sweden) 157

Dynamics of energy, water, carbon and nitrogen in agricultural ecosystems: simulation and experimental validation
R.F. Grant (Edmonton, Canada) 169

A deterministic evaluation analysis applied to an integrated soil-crop model
M. Vanclooster, P. Viaene, J. Diels and J. Feyen (Leuven, Belgium) 183

Simulation of crop production, water and nitrogen balances in two German agro-ecosystems using the DAISY model
H. Svendsen, S. Hansen and H.E. Jensen (Copenhagen, Denmark) 197
Simulation of temperature-, water- and nitrogen dynamics using the model CANDY
U. Franko, B. Oelschlägel and S. Schenk (Bad Lauchstädt, Germany) 213
Comparing field data from north Germany with simulations of the nitrogen model N-SIM
Th. Schaaf (Freising, Germany), E. Priesack (Oberschleißheim, Germany) and T. Engel (Freising, Germany) 223
Modelling the mineralization and leaching of nitrogen from crop residues during three successive growing seasons
A.P. Whitmore (Haren, Netherlands) 233
Performance of the plant growth models of the Special Collaborative Project 179 with respect to winter wheat
U. Schröder, O. Richter and K. Velten (Braunschweig, Germany) 243
Validation: an objective or a tool? Results on a winter wheat simulation model application
Z. Bacsi and F. Zemankovics (Keszthely, Hungary) 251
A data set from north Germany for the validation of agroecosystem models: documentation and evaluation
C.W. McVoy (Braunschweig, Germany), K.C. Kersebaum (Müncheberg, Germany), M. Arning, P. Kleeberg, H. Othmer and U. Schröder (Braunschweig, Germany) 265
